## Arizona Report of Public Agency Performance on Racial / Ethnic Disproportionate Representation by Disability

## Indicator 10: Racial / Ethnic Disproportionality by Disability

Percent of PEAs with disproportionate representation of racial and ethnic groups in specific disability categories that is the result of inappropriate identification.

## Measurement

Arizona uses Statistical Analysis Software (SAS) and a data analysis tool provided by Westat Research Corporation to consider ethnicity by disability information to identify those education agencies in Arizona that have unusually high or unusually low rates of students (aged 6–21) in special education. The tools compare the ethnic and disability makeup of the State to the ethnic and disability data of each agency and provide a weighted risk ratio (WRR) for each agency.

Arizona uses a WRR of  $\geq$  3.0 for over identification and a WRR of  $\leq$  0.30 for under identification in determining if a PEA has disproportionate representation. Because Indicator 10 is concerned with disproportionate representation that is the result of inappropriate identification, the ADE reviews the policies, procedures, and practices of the identified PEAs to determine compliance with child find and evaluation requirements.

## **Explanation of Indicator**

The table below indicates whether or not each PEA had a WRR of  $\geq 3.0$  or  $\leq 0.30$  for any ethnic group and six disability categories. If the answer to that question is "yes", the table indicates if the State determined that the PEA had inappropriate policies, practices, or procedures in identification. The data reported are for school year 2007–2008.

**State Target** for SY 2007-2008: Zero PEAs with disproportionate representation that was the result of inappropriate identification.

PEA	Was disproportionate representation evident (WRR ≥ 3.0 or ≤ 0.30)?	Was disproportionate representation the result of inappropriate identification?	State Target Met?
